Profile

Quantitative development economist with demonstrated expertise in impact evaluation, monitoring systems, and policy-oriented research. Skilled in designing performance indicators and analytical frameworks for SDG-aligned programs, particularly in labor markets, gender equality, and food systems. Experienced in leading survey design, conducting evidence-based reporting, and supporting project evaluations in Sub-Saharan Africa and Europe, including in low-resource and post-crisis settings. Contributed to strategic initiatives with UNDP, UN Volunteers, and Focus 2030, delivering actionable insights through dashboards, briefs, and stakeholder coordination. Adept at transforming complex datasets into policy guidance and supporting multi-sector teams in multicultural environments. Committed to inclusive development, resilience, and results-based public strategies.

Professional Experience

Program Monitoring and Research Assistant - Focus 2030, Paris - France   May – Sep 2025
Drafted SDG - focused policy briefs on gender, health financing and climate strategies. Conducted cross- country data analysis using UN, WB, OECD databases for advocacy reports. Supported high - level stakeholder coordination and event preparation.

Quantitative Research Analyst - ERUDITE Laboratory, Gustave Eiffel University,   Jan – May 2025
France
Contributed to empirical research in development economics and evaluation of public policy. Cleaned and structured large-scale micro-level datasets for econometric analysis using Stata. Authored two reviews of the literature on social protection and the dynamics of the informal sector. Built econometric models (DiD, IV) in Stata for empirical development research.

Supply Chain Data Analyst - SOCOMORE, France   May – Oct 2024
Automated KPI dashboards to drive performance visibility across end-to-end (E2E) supply chain processes.Contributed to S&OP implementation, supporting demand-supply alignment and inventory optimization. Supported integration of sustainability metrics into supply chain reporting and decision-making. Collaborated cross-functionally to improve process efficiency and data-driven planning.

Research Contributor – UN Volunteer - UN / Association of African Entrepreneurs   Jan – Mar 2024
(Remote)
Authored an analytical paper : "Reinventing Informality in Sub - Saharan Africa : the role of Digital Innovation. Digital innovations analyzed for MSMEs resilience and tax integration.

Economic Analyst - UNDP Policy and Strategy Unit   Jul – Oct 2023
Supported macroeconomic analysis and development planning.

Collected and processed national economic and fiscal data to inform strategies aligned with the SDGs. Draft technical memos and visual briefings for UNDP decision-makers, focusing on inclusive growth, social protection, and post-COVID recovery in fragile institutional contexts.

Monitoring, Evaluation and Learning Assistant - GRETA - CCIMA   Feb 2022 – Jan 2023
Developed logical frameworks and data collection tools (KoBo, ODK, Excel) for monitoring and evaluation of migration/employment projects.
Trained local teams, consolidated and analyzed data, and prepared reports for donors.
Integrated accountability mechanisms and participated in inter-agency coordination meetings to disseminate results.

Economic Analyst Intern - Chamber of Commerce (CCIMA), Cameroon   Jul – Sep 2021
Contributed to the 2021 National Business Climate Report by leading SME data collection and authoring the chapter on COVID-19 impacts and informal sector dynamics. Conducted analysis on tax compliance, productivity constraints, and the role of trust in public institutions.

Education

Master in International Development Economics and Impact Evaluation - Gustave Eiffel University / Paris-Est Créteil University   2024 – 2025
Specialization: Applied Econometrics, Database management, Monitoring and Evaluation, Informal sector analysis and survey design

Master in Environmental, Energy and Food Economics - Paris-Saclay University / AgroParisTech   2024 – 2025
Intensive training in policy evaluation and sustainable development economics. Developed expertise in quantitative modelling of food systems, energy transitions, and environmental policies.

Master in Supply Chain Management - Paris Panthéon-Assas University   2023 – 2024
Focus: Logistics optimization, ERP (SAP, X3), Power BI, Supply Chain Data modeling, humanitarian supply chain case study with WFP, GIZ and USAID, Double thesis on SOP and AI on Supply Chain performance and on AI and CRM

Master 1 in Project Management and Evaluation - ESSEC – School of Economic   2022 – 2023
Focused on project cycle management, theory of change, budgeting, and monitoring frameworks. Developed strong skills in results-based management, performance indicators, and applied evaluation methodologies.

Master 1 in Econometrics and Economic Policy - University of Douala   2021 – 2022
Intensive training in microeconometrics and quantitative public policy. Used Stata, R, and EViews to estimate DiD, IV, and panel data models on real-world development datasets.Completed applied projects on labor markets, welfare targeting, and policy evaluation.

Bachelor in Economic Sciences - University of Douala   2020 – 2021
Major in Economic Analysis and Public Policy. Developed strong foundations in macroeconomics,microeconomics, quantitative methods, and policy impact evaluation. Focused on data-driven approaches to development and public sector analysis.

Academic and Research Projects

Field Mission: Migration and Education in Romania - Gustave Eiffel University   2025
Participated in a 10-day academic field mission focused on the impact of migration on educational outcomes. Contributed to project design, survey administration, and preliminary planning for a randomized controlled trial (RCT).

Analytical Paper: Business Environment in Africa - UN Volunteers   2024
Authored a analytical paper as part of the United Nations Volunteers program, titled "Reinventing Informality in Sub-Saharan Africa: The Role of Digital Innovations", exploring resilience, informality, and digital tools for MSMEs.

SDG Hackathon - Gustave Eiffel University and UNDP   2024
Conducted a comparative meta-analysis using Cortex and R to assess policy outcomes in Sub-Saharan Africa and Latin America. Focused on SDG targets 1.3, 3.8, 5.4, 8.7, 8.8, and 10.4 — including child labour elimination, women's working conditions, and universal health coverage.

Certifications

Impact Evaluation – LMICs - World Bank   2025
RCTs, DiD, matching, and M&E frameworks.

Program Manager Certificate - IBM   2024
Project cycle, stakeholder coordination, results-based reporting.

Project Management Certificate - Google   2024
Project planning, Agile methods, Risk Management, Team coordination

Data Analytics Certificate - Google   2025
Data cleaning, visualization, and SQL.

Analyzing and Visualizing Data with Microsoft Power BI - Microsoft   2025
Data Modeling, Interactive Dashboards, Dax and M Functions.
